**Instructions:**

- All questions must be answers on the question paper.
- Only blue and black pens are allowed. Answers in pencil will not be marked.
- Scientific, non-programmable calculators are allowed.
- Cellular Phones are not allowed.
- No sharing of calculators and/or stationery.
- Round decimal answers to 2 decimal places.
- Simplify fraction answers.
- Show all calculations when requested.

**Question 1: Show your calculations.****[14]**

|       |   |     |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
|-------|---|-----|-----|----|---|---|---|---|--|---|---|----|---|---|--|---|-----|
| 1.1   | A factory produces soccer balls. The balls are packed in containers of 15 balls each. If they manufacture 2300 balls per day <b>(Make use of floor, ceiling or mod):</b>  |     | (2) |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
| 1.1.1 | How many full container can they dispatch at the end of the day?<br><br><b>Solution:</b><br><br>$2300 \setminus 15 = 153 \text{ full containers}$ ✓   | (1) |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
| 1.1.2 | How many balls will be left after the full containers are dispatched?<br><br><b>Solution:</b><br><br>$2300 \text{ mod } 15 = 5 \text{ balls}$ ✓   | (1) |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
| 1.2   | Two wires are 12 m and 15 m long. The wires are to be cut of pieces of equal length. What is the maximum length that the wires can be cut?<br><br><b>Solution:</b> <table><tr><td>2</td><td>12</td></tr><tr><td>2</td><td>6</td></tr><tr><td>3</td><td>3</td></tr><tr><td></td><td>1</td></tr></table> $\frac{1}{2}$ <table><tr><td>3</td><td>15</td></tr><tr><td>5</td><td>5</td></tr><tr><td></td><td>1</td></tr></table> $\frac{1}{2}$<br><br>$HCF = 3 \text{ cm}$ ✓ |     | 2   | 12 | 2 | 6 | 3 | 3 |  | 1 | 3 | 15 | 5 | 5 |  | 1 | (2) |

|       | 1   |     |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
| 3     | 15  |     |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
| 5     | 5   |     |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |
|       | 1   |     |     |    |   |   |   |   |  |   |   |    |   |   |  |   |     |

|       |   |     |
|-------|---|-----|
| 1.3   | <p>During the Easter holiday, Tumelo and James collected information about the number of cars that passed through Pumulani Toll Plaza heading to Limpopo from 13:00 to 14:00. They have observed that the type of cars that passed through were SUVs, Sedans, and Vans. They have recorded that a total of 2500 cars passed though during their observation. One-fourth (<math>\frac{1}{4}</math>) of the total number of cars were SUVs, and three-fifths (<math>\frac{3}{5}</math>) of the remaining number of cars were Sedans, and the rest were Vans. <b>Answer the following questions:</b></p> | (6) |
| 1.3.1 | <p>What fraction of the cars were Sedans?</p> <p><b>Solution:</b></p> $1 - \frac{1}{4} \quad \checkmark$ $\frac{3}{4} \text{ remaining} \quad \checkmark$ $\text{Sedans fraction: } \frac{3}{4} \times \frac{3}{5} \quad \checkmark$ $\text{Sedans fraction: } \frac{9}{20} \quad \checkmark$   | (4) |
| 1.3.2 | <p>What fraction of the cars were Vans?</p> <p><b>Solution:</b></p> $\text{Vans fraction: } \frac{3}{4} - \frac{9}{20} \quad \frac{1}{2}$ $\text{Vans fraction: } \frac{15}{20} - \frac{9}{20} \quad \frac{1}{2}$ $\text{Vans fraction: } \frac{6}{20} \quad \frac{1}{2}$ $\text{Vans fraction: } \frac{3}{10} \quad \frac{1}{2}$   | (2) |

|     |   |     |
|-----|---|-----|
| 1.4 | <p>A bag of oranges used to cost R30.00. The price was increased to R45.00. What is the percentage with which the price of the oranges has been increased?</p> <p><b>Solution:</b></p> $\text{Percentage Increase} = \frac{45-30}{30} \times 100 \quad \checkmark$ $\text{Percentage Increase} = 50\% \quad \checkmark$   | (2) |
| 1.5 | <p>At the TUT mail department, one employee can put 200 certificates into envelopes in three hours. How long would it take if the department employs 6 employees to put 200 certificates into envelopes, working at the same pace?</p> <p><b>Solution:</b></p> <p style="text-align: center;"><i>employees : hours</i></p> <p style="text-align: center;">1 : 3</p> <p style="text-align: center;">6 : x</p> $\frac{1}{6} = \frac{x}{3}$ $6x = 3 \quad \checkmark$ $x = \frac{1}{2} \text{ hours or } 0.5 \text{ hours} \quad \checkmark$ | (2) |

**Space for rough work:**

**Question 2: Show your calculations.****[10]**

|     |  |     |
|-----|--|-----|
| 2.1 | <p><i>Solve for x:</i></p> $4x^3 + 16x^2 - 48x = 0$ <p><b>Solution:</b></p> $4x(x^2 + 4x - 12) = 0 \quad \frac{1}{2}$ $(x + 6)(x - 2) = 0 \quad \frac{1}{2}$ $(x + 6) = 0 \text{ or } (x - 2) = 0 \quad \frac{1}{2}$ $x = -6 \text{ or } x = 2 \quad \frac{1}{2}$  | (2) |
| 2.2 | <p>Simplify the following expression:</p> $\frac{3x^4 - 3}{x^2 - 6x + 5} \times \frac{x^2 - 3x - 10}{x^2 + 3x + 2} \div \frac{6x^2 + 6}{12x}$ <p><b>Solution:</b></p> $\frac{3(x^4 - 1)}{(x - 1)(x - 5)} \times \frac{(x - 5)(x + 2)}{(x + 1)(x + 2)} \times \frac{12x}{6(x^2 + 1)} \quad \checkmark \checkmark$ $\frac{3(x - 1)(x + 1)(x^2 + 1)}{(x - 1)(x - 5)} \times \frac{(x - 5)(x + 2)}{(x + 1)(x + 2)} \times \frac{12x}{6(x^2 + 1)} \quad \checkmark$ $6x \quad \checkmark$ | (4) |

2.3

Three years ago James was eleven times older than Patrick. Find (4)  
James and Patrick current age if their combined age is now 30 years.

Let  $x$  be Patrick's age 3 years ago.

Fill in the below table:

|         | 3 years ago | Now                     |
|---------|-------------|-------------------------|
| James   | $11x$       | $11x + 3$ $\frac{1}{2}$ |
| Patrick | $x$         | $x + 3$ $\frac{1}{2}$   |

Find their ages.

**Solution:**

$$11x + 3 + x + 3 = 30 \quad \checkmark$$

$$12x + 6 = 30$$

$$12x = 24$$

$$x = 2 \quad \checkmark$$

$$James = 11(2) + 3 = 25 \text{ years old} \quad \frac{1}{2}$$

$$Patrick = 2 + 3 = 5 \text{ years old} \quad \frac{1}{2}$$

**Question 3: Show your calculations.****[8]**

3.1

Determine the equation of a straight-line graph represented in the given cartesian plane:

(3)

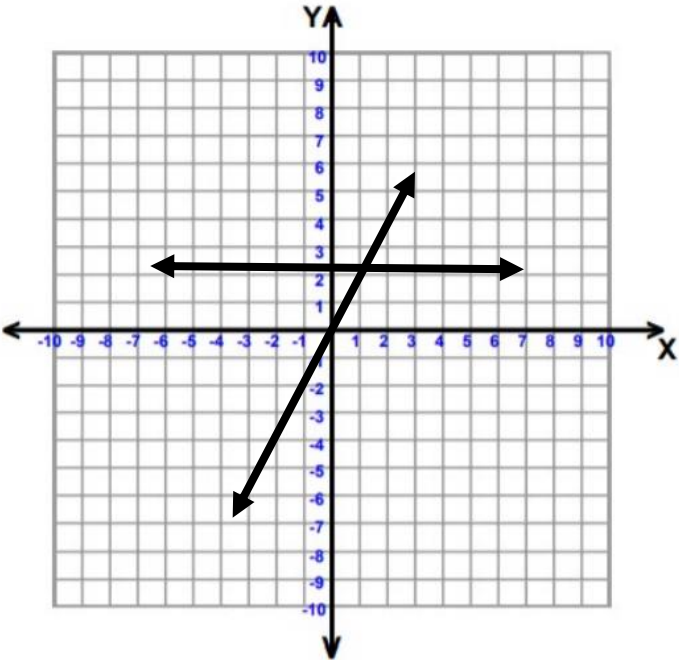

**Solution:**

$$m = \frac{0 - (-4)}{5 - 0} \quad \checkmark$$

$$m = \frac{4}{5}$$

$$c = -4 \quad \checkmark$$

$$y = \frac{4}{5}x - 4 \quad \checkmark$$

|     |  |     |
|-----|--|-----|
| 3.2 | <p>Consider the following equation of line graphs:</p> $y = 4x - 2 \text{ and } y = -\frac{1}{4}x + 5$ <p>Without drawing these graphs, what is the significance about these graphs?</p> <p><b>Answer:</b></p> <p><b>The two line are perpendicular to each other. ✓</b></p>   | (1) |
| 3.3 | <p>Solve the following lines simultaneously by drawing the straight-line graphs:</p> <p>Line 1: <math>y = 2x + 2</math> and,</p> <p>Line 2: <math>y = 4</math></p> <div style="text-align: center;"> <p>✓✓</p>  </div> <p><math>X = 1</math> ✓</p> <p><math>Y = 4</math> ✓</p> | (4) |

4.1

Given the following diagram:

(6)

(12)

4.1.1

Calculate the length of EF.

(3)

**Solution:**

$$EG = 1 + 3 = 4 \text{ cm} \quad \checkmark$$

$$FG^2 = EG^2 + EF^2$$

$$5^2 = 4^2 + EF^2 \quad \checkmark$$

$$25 = 16 + EF^2$$

$$EF^2 = 9$$

$$EF = 3 \text{ cm} \quad \checkmark$$

|  |  |       |   |     |  |
|--|--|-------|---|-----|--|
|  |  | 4.1.2 | <p>Calculate the Area of the shape.</p> <p><b>Solution:</b></p> $Area = (1 \times 2) + (4 \times 2) + \frac{1}{2}(4 \times 3) \quad \checkmark \checkmark$ $Area = 2 + 8 + 6$ $Area = 16 \text{ cm}^2 \quad \checkmark$ | (3) |  |
|--|--|-------|---|-----|--|

**Space for rough work:**

## Question 6

[14]

6.1

Consider the following sets:

$$A = \{5, 6, 7\}, \quad B = \{1, 3, 6, 9\} \text{ and } C = \{2, 9\}.$$

List the following sets:

|              |  |     |
|--------------|--|-----|
| $A - B$      | $\{5, 7\}$ ✓   | (1) |
| $C \times A$ | $\{2, 5\}, \{2, 6\}, \{2, 7\}, \{9, 5\}, \{9, 6\}, \{9, 7\}$ ✓ | (1) |
| $A \Delta B$ | $\{5, 7, 1, 3, 9\}$ ✓  | (1) |

(3)

6.2

Given the following Venn diagram:

List elements of the following sets:

|       | Question              | Answer        |     |
|-------|-----------------------|---------------|-----|
| 6.2.1 | $A \cap B$            | $\{0, 2, 8\}$ | (1) |
| 6.2.2 | $(A \cap B) \cap C$   | $\{8\}$       | (1) |
| 6.2.3 | $(A \cup B) \cap C$   | $\{4, 7, 8\}$ | (1) |
| 6.2.4 | $C - (A \cup B)$      | $\{10, 11\}$  | (1) |
| 6.2.5 | $\overline{B} \cap A$ | $\{1, 3, 4\}$ | (1) |

(5)

6.3

Given the following set:

(6)

$$M = \{apple, orange, tomato\}$$

Answer the following questions:

| Question |            | Answer |     |
|----------|------------|--------|-----|
| 6.3.1    | $n(M)$     | 3      | (1) |
| 6.3.2    | $n(P(M))=$ | 8      | (1) |

Use a binary table to determine all possible subsets of set M.

(4)

| Decimal Numbers   | Binary Numbers |        |        | Subsets                 |
|-------------------|----------------|--------|--------|-------------------------|
|                   | Apple          | Orange | Tomato |                         |
| 0                 | 0              | 0      | 0      | { }                     |
| 1                 | 0              | 0      | 1      | {Tomato}                |
| 2                 | 0              | 1      | 0      | {Orange}                |
| 3                 | 0              | 1      | 1      | {Orange, Tomato}        |
| 4                 | 1              | 0      | 0      | {Apple}                 |
| 5                 | 1              | 0      | 1      | {Apple, Tomato}         |
| 6                 | 1              | 1      | 0      | {Apple, Orange}         |
| 7                 | 1              | 1      | 1      | {Apple, Orange, Tomato} |
| ½ per correct row |                |        |        |                         |

**Question 8: Show your calculations.**

**[16]**

8.1 Given the number  $7EB_{16}$  :

(4)

8.1.1 Convert to Binary:

(2)

| 7 |   |   |   | E |   |   |   | B |   |   |   |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 0 | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 0 | 1 | 1 |

$$7EB_{16} = 1111101011_2 \quad \checkmark \checkmark$$

8.1.2 Convert to Octal:

(2)

|   |   |   |   |   |   |   |   |   |   |   |   |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 0 | 1 | 1 | 1 | 1 | 1 | 1 | 0 | 1 | 0 | 1 | 1 |
| 3 |   |   | 7 |   |   | 5 |   |   | 3 |   |   |

$$7EB_{16} = 3753_8 \quad \checkmark \checkmark$$

8.2 Find  $+25_{10}$  and  $-25_{10}$  in sign and size code representation using 6 bits. (3)

**Solution:**

|   |    | Rem |
|---|----|-----|
| 2 | 25 | 1   |
| 2 | 12 | 0   |
| 2 | 6  | 0   |
| 2 | 3  | 1   |
| 2 | 1  | 1   |
|   | 0  |     |

$$+25_{10} = 011001_2 \quad \checkmark$$

$$-25_{10} = 111001_2 \quad \checkmark$$

8.3 Find the product of  $1001_2$  and  $100_2$  (3)

**Solution:**

$$\begin{array}{r}
 1001 \\
 \times 100 \\
 \hline
 0000 \quad \checkmark \\
 +0000 \\
 \hline
 00000 \quad \checkmark \\
 +1001 \\
 \hline
 100100_2 \quad \checkmark
 \end{array}$$

|     |   |     |
|-----|---|-----|
| 8.4 | <p>Calculate the following by making use of the 2's complement:</p> $01000010_2 - 00010001_2$ <p><b>Solution:</b></p> $01000010_2 + K_2(00010001_2) \quad \checkmark$<br>$\begin{array}{rcl} & K_2 & (00010001_2) \\ \text{Compliment:} & & 11101110_2 \quad \checkmark \\ \text{Add 1:} & & 00000001_2 \quad \checkmark \\ & & 11101111_2 \quad \checkmark \end{array}$<br>$\begin{array}{r} 01000010_2 \\ +11101111_2 \\ \hline 100110001_2 \quad (\text{discard 9th bit}) \quad \checkmark \end{array}$<br>$01000010_2 - 00010001_2 = 00110001_2 \quad \checkmark$ | (6) |
