SUMMATIVE ASSESSMENT
PAPER 2 (Intervention)

**Computational Mathematics and
Discrete Mathematics
(Extended) (Year 1)**

COHF05D & DSMF06D

04 February 2022
Summative Assessment

Duration: 120 min
Total: 92
Full Marks: 90
Number of Pages: 21

Examiner: MS Sediela
Co-Examiner: C Coetzee
Moderator: D Masethe

This paper consists of 21 pages

INSTRUCTIONS AND INFORMATION

- **Answer ALL** the questions.
 - **Read ALL** the questions carefully.
 - Non-programmable **calculators** are allowed.
 - **No pencil** work will be marked, use a black/blue pen.
 - Answers must be rounded to **2 decimals** (if not specified).
 - All **exponents** in final answers must be **positive**.
 - **Show all your calculations!**
-

QUESTION 1: Indicate if the following are true or false.[$\frac{1}{2} \times 10 = 5$]

Questions		True	False
1.1	All composite numbers are counting numbers.	X $\frac{1}{2}$	
1.2	Prime numbers include negative whole numbers		X $\frac{1}{2}$
1.3	The first factor of a given number is 1, and the last factor is the number itself.	X $\frac{1}{2}$	
1.4	5 is a factor but not a multiple of 5.		X $\frac{1}{2}$
1.5	Prime numbers have one or more factors.		X $\frac{1}{2}$
1.6	$\frac{5}{7}$ is rational.	X $\frac{1}{2}$	
1.7	$9 + (7 + 3) = (9 + 7) + 9$ represent the Commutative Law of addition.		X $\frac{1}{2}$
1.8	When doing calculations, multiplication must always be done before division.		X $\frac{1}{2}$
1.9	Given $2x + 3y + 3 = 0$ the y-intercept ordered pair is (0, 3)		X $\frac{1}{2}$
1.10	The gradient of a vertical line is undefined.	X $\frac{1}{2}$

(include units where applicable)**

2.1

Lindiwe sells muffins during the school break. On Friday, she sold $\frac{5}{7}$ of the muffins that she baked. She had only 10 muffins left. How many muffins did she bake?

2

Solution:

$$\text{Fraction left: } 1 - \frac{5}{7} = \frac{2}{7} \quad \frac{1}{2}$$

$$\frac{7}{2} \times 10 \quad \frac{1}{2}$$

$$\frac{70}{2} \quad \frac{1}{2}$$

$$35 \text{ muffins} \quad \frac{1}{2}$$

2.2

Two neon lights are switched on at the same time. One flashes every 60 seconds and the other one every 140 seconds. In how many seconds will they flash together?

2

Solution:

2	60
2	30
3	15
5	5
	1

$\frac{1}{2}$

2	140
2	70
5	35
7	7
	1

$\frac{1}{2}$

$$60 = 2^2 \times 3 \times 5$$

$$140 = 2^2 \times 5 \times 7$$

$$LCM = 2^2 \times 3 \times 5 \times 7 = 420 \text{ seconds} \quad \checkmark$$

2.3	<p>The price of an item is R34.50 after adding a 15% VAT. What was the original price of the item?</p> <p>Solution:</p> <div><div><div><div>34.50</div><div>1+0.15</div><div>34.50</div><div>1.15</div><div>R30.00</div></div><div><div>✓</div><div>✓</div></div></div></div> <td>2</td>	2						
2.4	<p>Bongiwe offers free Mathematics extra classes to grade 10 students as part of her community project. She travels a certain distance to offer these classes at three schools. She travels a fifth of the distance to reach the first school. She travels two-thirds of the remaining distance to reach the second school. What fraction of the distance is remaining to reach the last school?</p> <p>Solution:</p> <div><div><div><div><i>first school:</i></div><div>$1 - \frac{1}{5} = \frac{4}{5}$</div><div>$\frac{1}{2}$</div></div><div><div><i>second school:</i></div><div>$\frac{4}{5} \times \frac{2}{3} = \frac{8}{15}$</div><div>$\frac{1}{2}$</div></div><div><div><i>Fraction left to reach last school:</i></div><div>$\frac{4}{5} - \frac{8}{15} = \frac{4}{15}$</div><div>✓</div></div></div></div> <td>2</td>	2						
2.5	<p>It takes Lerato and Thabo 15 hours to develop a mobile application. How many people must they add to finish the same type of mobile application in 10 hours?</p> <p>Solution:</p> <table><tr><td>People</td><td>hours</td></tr><tr><td>2</td><td>15</td></tr><tr><td>x</td><td>10</td></tr></table> <div><div><div><div>$\frac{x}{2} = \frac{15}{10}$</div><div>✓</div></div><div><div>$10x = 30$</div><div>$x = 3 \text{ hours}$</div><div>✓</div></div></div></div> <td>2</td>	People	hours	2	15	x	10	2

3.3	<p>The following numbers are represented in sign and size code using 7 bits: 0100101_2 and 1100101_2</p> <p>Convert the numbers to decimal.</p> <p>Solution:</p> <p style="text-align: center;">$1 \times 2^5 + 0 \times 2^4 + 0 \times 2^3 + 1 \times 2^2 + 0 \times 2^1 + 1 \times 2^0 = 37 \quad \checkmark$</p> <p style="text-align: center;">$0100101_2 = 37_{10} \quad \frac{1}{2}$</p> <p style="text-align: center;">$1100101_2 = -37_{10} \quad \frac{1}{2}$</p>	2														

3.4

Calculate the following by making use of the 2's compliment. Convert the answer to decimal.

3½

$$01110001_2 - 01001101_2 - 00010111_2$$

$$01110001_2 - 01001101_2 - 00010111_2$$

$$K_2(01001101_2)$$

Complement	10110010 ₂	✓
------------	-----------------------	---

Add +1	00000001 ₂	✓
--------	-----------------------	---

$$K_2(01001101_2) = 10110011_2$$

$$K_2(00010111_2)$$

Complement	11101000 ₂	✓
------------	-----------------------	---

Add +1	00000001 ₂	✓
--------	-----------------------	---

$$K_2(00010111_2) = 11101001_2$$

$$01110001$$

$$+10110011_2$$

$$100100100_2 \text{ (discard the 9th bit)}$$

$$+11101001_2$$

$$100001101_2 \text{ (discard the 9th bit)}$$

$$01110001_2 - 01001101_2 - 00010111_2 = 00001101_2$$

Convert answer to decimal

$$1 \times 2^3 + 1 \times 2^2 + 1 \times 2^0 = 13_{10}$$

Show your calculation.

4.1	<p>Christopher is mowed the lawn of his garden. On Monday he mowed $\frac{2}{7}$ of the lawn and on Tuesday he mowed $\frac{1}{3}$ of the lawn. If 400 square metres is left to be mowed, what is the total area of the lawn? (Use an equation to solve the problem)</p> <p><i>let x be Lerato's monthly allowance</i></p> $x - \frac{2}{7}x - \frac{1}{3}x = 400 \quad \checkmark$ $21x - 21(\frac{2}{7}x) - 21(\frac{1}{3}x) = 21(400) \quad \checkmark$ $21x - 6x - 7x = 8400$ $8x = 8400 \quad \checkmark$ $x = 1050 \text{ square metres} \quad \checkmark$	4
4.2	<p>A clothing shop sells designer shirts and unknown brand shirts. Sandra bought 3 designer shirts and 4 unknown brand shirts for R304.00. Nelson bought one designer shirt and one unknown brand shirt for R90.00. Calculate the price of one designer shirt and the price of one unknown brand shirt. (Use equation(s) to solve the problem)</p> <p><i>let x be the price of a designer shirt</i></p> <p><i>let y be the price of unknown brand shirt</i></p> $3x + 4y = 304 \dots \dots (1) \quad \checkmark$ $x + y = 90 \dots \dots (2) \quad \checkmark$ <p><i>from (2)</i></p> $x = 90 - y \dots \dots (3) \quad \checkmark$ <p><i>sub (3) into (1)</i></p> $3(90 - y) + 4y = 304 \quad \checkmark$ $270 - 3y + 4y = 304$ $y = 304 - 270$ $y = 34 \quad \checkmark$	6

	<p><i>Price of designer shirt is R56.00 ✓</i></p> <p><i>Price of unknown brand shirt is R34.00.</i></p>	
4.3	<p>Calculate the value of k if $2y + x = 5$ and $3kx + y = 4$ are perpendicular.</p> <p>Solution:</p> $2y + x = 5$ $y = -\frac{x}{2} + \frac{5}{2} \quad \checkmark$ $y = -3kx + 4 \quad \checkmark$ <p><i>perpendicular lines gradient product is equal to -1</i></p> $-\frac{1}{2} \times -3k = -1 \quad \checkmark$ $k = -\frac{2}{3} \quad \checkmark$	4
4.4	<p>Simplify:</p> $\frac{xy + 3x - 2y - 6}{(x - 2)^2} + \frac{y}{2 - x}$ <p>Solution:</p> $\frac{x(y + 3) - 2(y + 3)}{(x - 2)^2} - \frac{y}{x - 2}$ $\frac{(y + 3)(x - 2)}{(x - 2)(x - 2)} - \frac{y}{x - 2} \quad \checkmark$ $\frac{(y + 3)}{x - 2} - \frac{y}{x - 2} \quad \checkmark$ $\frac{(y + 3) - y}{x - 2} \quad \checkmark$ $\frac{3}{x - 2} \quad \checkmark$	4

Show all your calculations.

- 5.1** Michael is building a deck chair by placing strips of wood on an existing frame. He calculates that he will need 25 strips on the chair.

3

(Picture shows concept only NOT the correct number of strips)

5.1.1	<p>If he cuts the wood into 0.8 m strips, what is the total length of wood needed?</p> <p>Solution:</p> <p>$25 \times 0.8 = 20m$ ✓</p>	(1)						
5.1.2	<p>If the wood comes in 500 cm lengths, how many lengths will be needed?</p> <p>Solution:</p> <table border="1"><tr><td>cm</td><td>m</td></tr><tr><td>100</td><td>1</td></tr><tr><td>x</td><td>20</td></tr></table> <p>$x = 2000\text{ cm}$ $\frac{1}{2}$</p> <p>$therefore: \frac{2000}{500} = 4\text{ strips}$ $\frac{1}{2}$</p>	cm	m	100	1	x	20	(1)
cm	m							
100	1							
x	20							
5.1.3	<p>If the dimension of each length of wood is 5 cm x 2 cm x 3 m, what is the total volume (in cubic metres) of wood needed?</p> <p>Solution:</p> <p>$V = 4(0.05 \times 0.02 \times 3)$ $\frac{1}{2}$</p> <p>$V = 0.012m^3$ $\frac{1}{2}$</p>	(1)						

5.2

Kate started driving at 07:00 from a point at a rate of 40 km/h. Joyce started driving one hour later than Kate from the same point, going in opposite directions at a rate that is 10 km/h faster than Kate's speed. At what time will they be 220 km apart?

3**Solution:**

$$d_K + d_J = 220$$

$$s_K t_K + s_J t_J = 220$$

$$40t + (40 + 10)(t - 1) = 220 \quad \checkmark$$

$$40t + 50t - 50 = 220$$

$$90t = 270$$

$$t = 3 \text{ hours} \quad \checkmark$$

$$\text{therefore: } 07:00 + 3 \text{ hours} = 10:00 \quad \checkmark$$

7.1

Given set $B = \{a, b, c\}$. Answer the following question about the subsets of set A.

1½

	Question	Answer	
7.1.1	List subsets of set B that have zero elements.	$\{\}$	(½)
7.1.2	List subsets of set B that have one element (singleton subsets of set A)?	$\{a\}, \{b\}, \{c\}$	(½)
7.1.3	List subsets of set B that have two elements?	$\{a, b\}, \{a, c\}, \{b, c\}$	(½)

7.2

Complete the following table:

1

Set Builder Notation	Enumeration Method (Roster Method)
$\{2x x \in \mathbb{N}_0, x \leq 4\}$ ½	$\{0, 2, 4, 6, 8\}$
$\{2x + 1 x \in \mathbb{N}, 1 \leq 2x + 1 < 7\}$	$\{3, 5\}$ ½

7.3

Given the following Venn diagram:

5

Let W represent animals living in water.
Let M represent animals that are mammals

Answer the following questions:

Question	Answer	
7.3.1 $n(W \cap M)$	1	($\frac{1}{2}$)
7.3.2 $n(P(W \cap M))=$	2	($\frac{1}{2}$)

7.3.3	Use a binary table to determine all possible subsets of set M. (4)
-------	--

Decimal Numbers	Binary Numbers			Subsets
	Lion	Dog	Whale	
0	0	0	0	$\{\}$ $\frac{1}{2}$
1	0	0	1	$\{ Whale \}$ $\frac{1}{2}$
2	0	1	0	$\{ Dog \}$ $\frac{1}{2}$
3	0	1	1	$\{ Dog, Whale \}$ $\frac{1}{2}$
4	1	0	0	$\{ Lion \}$ $\frac{1}{2}$
5	1	0	1	$\{ Lion, Whale \}$ $\frac{1}{2}$
6	1	1	0	$\{ Lion, Dog \}$ $\frac{1}{2}$
7	1	1	1	$\{ Lion, Dog, Whale \}$ $\frac{1}{2}$

7.4

The head of department of a school has surveyed 160 students about their favourite subject. Of the 160 students:

- 110 favour Math,
- 125 favour Physics,
- 5 neither favour Math nor Physics.

Let M be the set of students who favour Maths.

Let P be the set of students who favour in Physics.

Draw a Venn Diagram that represents the number of students.

2½

7.5	<p>Consider the following sets:</p> $A = \{a, e, i, o, u\}, \quad B = \{y, e, a, r\} \text{ and } C = \{d, a, t, e\}.$ <p>List the following sets:</p> <table><tr><td>$B - C$</td><td>$\{y, r\}$ $\frac{1}{2}$</td></tr><tr><td>$A \Delta C$</td><td>$\{i, o, u, d, t\}$ $\frac{1}{2}$</td></tr></table>	$B - C$	$\{y, r\}$ $\frac{1}{2}$	$A \Delta C$	$\{i, o, u, d, t\}$ $\frac{1}{2}$	1											
$B - C$	$\{y, r\}$ $\frac{1}{2}$																
$A \Delta C$	$\{i, o, u, d, t\}$ $\frac{1}{2}$																
7.6	<p>Let H and J be finite sets: <i>If $n(H - J) = 50$ and $n(H \cup J) = 80$ and $n(J - H) = 20$, determine $n(H)$</i></p> <p>Solution:</p> $n(H \cup J) = n(H - J) + n(H \cap J) + n(J - H) \quad \checkmark$ $80 = 50 + n(H \cap J) + 20 \quad \checkmark$ $n(H \cap J) = 80 - 70$ $n(H \cap J) = 10 \quad \checkmark$ $\text{therefore: } n(H) = n(H \cap J) + n(H - J) \quad \checkmark$ $n(H) = 10 + 50 = 60 \quad \checkmark$	5															
7.7	<p><i>If $B = \{2, 4\}$ and $C = \{1, 2, 3, 4, 5, 6\}$, State if the following is true or false.</i></p> <table><tr><th>Statement</th><th>True</th><th>False</th></tr><tr><td>$B \subset C$</td><td>$\times \frac{1}{2}$</td><td></td></tr><tr><td>$C \subseteq B$</td><td></td><td>$\times \frac{1}{2}$</td></tr><tr><td>$B \supset C$</td><td></td><td>$\times \frac{1}{2}$</td></tr><tr><td>$C \supseteq B$</td><td>$\times \frac{1}{2}$</td><td></td></tr></table>	Statement	True	False	$B \subset C$	$\times \frac{1}{2}$		$C \subseteq B$		$\times \frac{1}{2}$	$B \supset C$		$\times \frac{1}{2}$	$C \supseteq B$	$\times \frac{1}{2}$		2
Statement	True	False
